

Save, Print and Export

- Saved regimens are automatically date and time stamped
- Select English or Spanish from the drop-down menu
- Customize **MEDACTIONPLAN™** to meet each patient's individual needs
- Email or export schedules directly to patient

My Daily Schedule™—Choose letter, large-print and/or wallet-size. Give patients a visual reminder of which medications to take, how much to take, and at what time.

Special Instructions—Dietary considerations for each medication. Instructions can be edited.

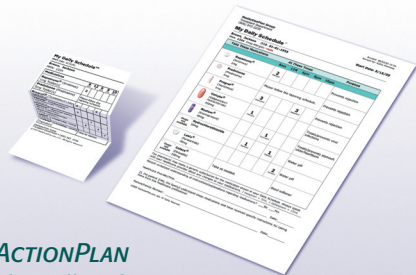

Weekly Med Checklist—Choose from weekly or monthly formats. Patients keep track of what they take and when.

Weekly Health Record—Chart used by patients to record their vital signs, such as blood pressure, temperature, weight, etc.

Taper and Anticoagulation Schedules—Help patients with complex regimens.

Patient Education Tools—Improve understanding of medical issues.

and more...

“MedActionPlan makes our patients feel very comfortable with the medication education process. The schedules are organized, clear, and professional in appearance.”

Eric Tichy, Pharm.D.
Organ Transplantation Specialist—Yale New Haven Hospital

“MedActionPlan helps my patients identify their medications visually, and understand the purpose of following their medication regimen as directed.”

Lisa Castro, LVN
UHS San Antonio, TX

What is MEDACTIONPLAN™?

MEDACTIONPLAN for Organ Transplant is a free web-based program that allows healthcare professionals to customize, document, and print med schedules for their patients, empowering them to become active partners in their healthcare.

Medication Schedules and **Checklists** help with adherence to medical therapy

Patient Education Topics use patient friendly language and vivid illustrations to improve understanding

Schedule by Time, Wallet-Size, Large-Print and other formats meet individual needs

HIPAA compliant so medical information is safe and secure

Key features of Version 5.0 include:

- NEW Taper schedule**—quickly create complex tapering schedules
- NEW Anticoagulation schedule**—prevent dosing errors
- NEW Flexible new dosing options**, including fractional dosing
- NEW Route of Administration** for each medication
- NEW Improved printing and new schedule layout options**

Select Medications

Add medications with one of the following methods:

Build on existing regimens to save time

- **Default Regimens**—can be set up by your local administrator to reflect the medications, doses, and times commonly used by your facility
- **Saved Patient Regimens**—can be recalled and updated

Add medications one-at-a-time

- **Quick Find**—search by typing in the drug name and click on the medication when it appears
- **Add a medication not found in the database**

“As we continue to use MedActionPlan we see positive outcomes with compliance and medication education from our patients.”

Theresa R. David, MSN, RN
Clinical Nurse Specialist—The Hospital of The University of Pennsylvania

Create a MEDACTIONPLAN™ in English or Spanish

Set Doses and Times

Multiple medication time slots can be set for each regimen:

- **Select daily medication times**—up to 12 time slots
- **Select quantity to be taken at each time**—now with improved fractional dosing
- **Non-Daily option** is used for medications with a special use application (e.g. “take one tablet every Monday, Wednesday, and Friday with breakfast”)
